Members can register for any upcoming event by clicking on the 'Event link' for the webinars they want to attend. Once a webinar has been delivered, members will be able to use the same link to watch on demand. Clicking on the link will take members through to the ON24 platform, which we're using to deliver these events. There's no requirement for members to create a user account. They simply need to add their first and last names, email address and company name. Members will receive a confirmation email containing a meeting invitation that they can add to their calendar, as well as reminders the day before the event and again shortly before it's due to begin. See Legal & General's [privacy policy](#) for more details on how member data is used.
